Announcement of product replacement of discontinued screw anchor HUS-V

Dear Sir/Madam

Hilti is introducing the new generation of premium screw anchor for use in concrete, "HUS2-H" which will be the direct successor of standard screw HUS-V.

HUS2-H is a suitable product for non-structural base plate fastening (eg. secondary steel structures, handrails and variety of fastenings with less safety relevance) and holds ETA-19/0170 approval for use in cracked and non-cracked concrete based on EAD 330232. All performance and technical properties of HUS2-H screw anchor are same or better compared to the HUS-V.

The new premium screw anchor is also perfect for temporary and reusable fastening. Hilti provides a set of technical data for reusability with Hilti Check Gauge D=8-10-14mm in combination with performance values in fresh concrete.

All technical information is available in the Hilti Fastening Technology manual or on www.hilti.com.

In case of any questions, please contact your sales representative.

Yours sincerely,

Pavol Plesnik
Global product manager

Patricia Moreira-Da-Silva
